*Trade work is electrical, plumbing, and mechanical work performed.

**Window replacement and siding where no other work or structure modifications are being done.

Abilene does not require general contractors to be licensed.

Structures less than 200 sq ft must be anchored.

Residential property owners doing their own work, on the property of their address, are not required to be licensed but a permit is still required.

Landlords/Property Investors are not allowed to perform any trade work without being a licensed contractor.
